COUNTRY BUTTER DRIFTING DOWN Southern Strawberries in Bountiful Sup-

ply and Lower. DEMAND FOR FISH EQUAL TO SUPPLY

OFFICE OF PITTSBURG DISPATCH, FRIIDAY, May 3, 1888. In fruit and vegetable lines trade for the week has been quiet, owing to chilly, wet weather. Heavy frosts have produced a scarcity of asparagus. Everything above ground was nipped vesterday morning.

Strawberries from the South are in abundant supply. A good article should retail ant supply. A good article should retail at 20c. Jobbers have been selling a fair article at 10c to-day. Cucombers and radishes nome grown are in good supply at rates cheaper ies was

than last Saturday. Golden wax beans and new peas from Florida are in the stalls. Country butter has been drifting downward the past week. A peddler who pays weekly risits to our markets reports a great abundance of choice butter through his balliwitk. Said he: "I sold to stores to-day a very good article at 16c, and furnished the very best made at 26c. The latter price was obtained for butter that would have brought 35c a few weeks ago." The peddler who reported the above said that he had never known poultry as scarce through the region he visits as it has been the past few weeks.

The fish trade holds up unusually well, considering that Lent is two weeks away. Trad-last week was fully as good as it was the clos ing week was thily as good at twis the choing week of Lent. There are at yet no signs of
a falling off. At the Diamond Market butcher
stalls an improvement in trade -ver trade of recent weeks was reported. The average consumer is evidently returning to the old reliable meats after a long fast. Eggs grow
firmer, but retail prices are the same as a week

ago. Florists report a slight decline from trade of last week. It isto be remembered, however, that last week and the previous week there was a boom to the floral trade, and more decorations were disposed of than ever before in the same time.
Unusual activity in tropical fruits has been reported by jobbers for the week past.
Following are the latest retail prices for Saturday market basket supplies as furnished

CHICAGO-A very fair business was trans c.HCAGO—A very fair business was train-acted in wheat to-day, and the feeling was stronger, with part of yesterday's decline re-covered. June showed more strength and ad-vanced 1%c and closed about 1%c higher. July opened a shade stronger than yesterday's closing and gradually improved, advancing 1%c and closed about 1c higher than yesterday. There was nothing special in shape of out-side news to cause the firmness, which was at-tributed to a change in local sentiment, that perhaps prices for the present were low enough. A LOCAL CROCKETT

How Broker McKee Brings Down Stocks When He Goes for Them.

ANOTHER BIG REAL ESTATE DEAL An Argument From the Country in Favor of Opening Diamond Street.

A RURAL KICK AGAINST THE WEATHER

John McKee is the Davy Crocket of the local brokers. When he goes gunning for a stock he generally brings it down. He was hungry for Wheeling Gas yesterday, and although he bagged considerable of it he had to fight for every share he got. Seeing that he was determined to have it, the other brokers did nothing but run the price up on him. But as that was business, and no ceipts. The near futures were relatively firmer and the premium of the more deferred deliveries was narrowed somewhat. The market opened at yesterday's closing prices, was firm and advanced %c, ruled steady, closing 146% higher than yesterday.

Outs were quiet, but steadier, and prices 146% higher than yesterday.

Outs were quiet, but steadier, and prices 146% higher. The amount of new business was not large, and a good part of the trading consisted in selling May and buying June and July at 166 difference.

Little interest was manifested in hog products, and the feeling was easier. The receipts of hogs were larger than generally anticipated, accompanied with a moderate decline in prices, and this feature had a tendency to enlarge the offerings of products, especially for July delivery. The general surroundings of the trade favored the bear element, and the market lacked support. Prices favored buyers and averaged lower on all descriptions. Trading centered mainly in July.

The leading futures ranged as follows: more than he expected, he neither kieked

touch to a real estate transaction involving \$100,000 cool cash. Details of the deal were not quite ready for laying before the public, but the property was described as "lying on a big hill between the rivers," which locates it somewhere above the city, probably on the line of the main pipe of the Wilkinsburg water works, as there are several tracts there that answer to the very indefinite description. But no matter where it is, it is a big deal, and furnishe additional proof that real estate is still in lively

While the architectural appearance of Pitts-burg has improved to a wonderful degree within the past dozen years or so. The future promises still greater advances in the same direction. Among the buildings in course of construction are those of the Commercial National Bank, the German National Bank, the Fidelity, the Vancergrift, the Gregg, and several others of almost equal importance. All of these will be imposing in size, highly finished and provided with the latest appliances for comfort and convenience. This is at once an evidence of prosperity and of an improved taste on the part of our citizens. The new Pittsburg will be one of the cleanest and handsomest cities in the Union.

Country people appear to be as deeply inter ested in the proposed Diamond street improve-ment as the city folk. They say the introduction of cable cars, with two tracks, on Flith avenue, renders it dangerous for them to drive over that thoroughfare to attend the marketa. The widening of Diamond street would not only relieve them from this danger and annoyance, but would give a fresh impetus to the country trade and largely increase the revenue of the city. This is a new and forcible argument in favor of the improvement.

"It would be impossible to tell just how much money this cold damp spell of weather has cost us, but it is considerable," remarked an East End gardener yesterday. "A large prosuch vegetables as managed to thrust themamounting to anything. But it is not too late to repair damages, and a warm rain, followed by clear, sunny weather, will bring things around all right, except that the crops will be late. So far as I have investigated, no great harm has been done to the early fruits and berries. Another freeze, however, would make lmost a clean sweep of them.'

OH Dull and Weak—Lambs Still Refuse to be. Sheared.

The oil market was both dull and weak yesterday. The highest price was \$8c, the lowest \$85%c, and the close \$85%c—a drop of haif a seen from the opening. Scarcity of certificates and high premium doubtless prevented a worse slump than it experienced, as there was a kire was a total absence of outside support. The feeling at the windup was decidedly bearish. There seems to be a growing indisposition to trade pending the Lima product. A short-time ago
the few remaining shares of a \$5,00,000 stock
company, of which lows a majority, were subseribed in San Francisco and a new company
incorporated, which will be amply able to susply America with beet sugar."
To this may be added the fact that Kansaa,
as stated in an interview with a Butler county
farmer, which appeared in THB DISPATCH in
few weeks are, is producing enough sugar
from sorptum to supply its, own wants. There
is no good reason why Pennsylvania should be
behind other States in the movement to obtain
a home supply of this necessary article.

15 DOCTORS FAILED To cure Mrs. Thomas Hatton, and she suffered on for 18 years. The aches and pains which she experienced in almost every part of her body was simply terrible. Those sharp, cutting pains across the small of her back and lower part of her body was almost unbearable. In fact she suffered with all those diseases and conditions uscaliar to women. For threefact she suffered with all those diseases and conditions peculiar to women. For three months her mind was unbalanced, and for months she was confined to her bed. She became very weak and emaciated, so that she only weighed 89 pounds. No one expected her to live, much less get entirely cured. After receiving three months' treatment with the physicians of the Catarrh and Dyspepsia Institute, 323 Penn avenue, who make a specialty of her disease, she says:

"I never want any one to suffer as I have for the past 13 years. The condition of my case was much worse than has been described, and I am only too gind to testify to my complete cure by the doctors of the Catarrh and Dyspepsia Institute.

I Would Have Been Dead,

Said Mr. Henry Robertson, "had I kept on in the way I was going. I had chronic bronchitis and a weakness of my left lung that was fast approaching consumption. I coughed and had great pressure and tightness across my lung, with pain about my shoulder blades. My appetite was very poor, and I had sour beishing of gas from my stomach all the time. I doctored with the best doctors I could hear of, but was fast getting worse. My kidneys also became diseased. I had pam across my back, bloating of the bowels, and the water was highly colored with a red, brick dust sediment. I became melancholy and discouraged and thought I could not live. Finally I began treatment with the physicians of the Polypathic Medical and Surgical Institute, who are specialists for chronic diseases, and although confined to the bed when I commenced treatment, and am 65 years old, my improvement was very rapid, and I feel that these physicians have saved my life. I am getting stronger every day and feel almost like a young man again.
